01. Premium Italian Build

Designed and manufactured in Italy with European-quality components.

02. Ventilated Cooling System

Ensures even airflow and consistent product temperature.

03. Low Maintenance Design

Simple construction reduces servicing and operating costs.

04. Integrated Condensing Unit

Built-in system with automatic water evaporation.

The TDVC Series Volcano Open Supermarket Displays combine premium Italian engineering with reliable open-front refrigeration performance. Designed for high-traffic retail environments, the range delivers consistent temperature control through a ventilated cooling system and an integrated condensing unit with automatic water evaporation.

Ideal for supermarkets, convenience stores, and specialty food retailers, the Volcano range enhances product visibility while maintaining operational efficiency. Its European build quality, low-maintenance design, and robust construction make it a dependable solution for continuous daily use.
